Q: jQuery Accordion with many sections - stop all openers I have an accordion that can have up to 1000+ elements in it. Each element has a unique id. I need to stop all openers when the first one is opened. The code that I am currently using is: `$(document).ready(function(){ $("#toggle-group-a").click(function(event){ $("#toggle-group-a").parent().next().slideToggle("slow"); $("#toggle-group-b").parent().next().slideUp("slow"); $("#toggle-group-b").parent().prev().slideUp("slow"); $("#toggle-group-c").parent().next().slideUp("slow"); $("#toggle-group-d").parent().next().slideUp("slow"); $("#toggle-group-e").parent().next().slideUp("slow"); $("#toggle-group-f").parent().next().slideUp("slow"); $("#toggle-group-g").parent().next().slideUp("slow"); $("#toggle-group-h").parent().next().slideUp("slow"); $("#toggle-group-i").parent().next().slideUp("slow"); $("#toggle-group-j").parent().next().slideUp("slow"); $("#toggle-group-k").parent().next().slideUp("slow"); $("#toggle-group-l").parent().next().slideUp("slow"); $("#toggle-group-m").parent().next().slideUp("slow");` 82157476af
