https://steamcommunity.com/games/593110/announcements/detail/1808664240333155775. Game is way too short and doesn't get anymore interesting, it seems like katamari at first, but once you realize how short the missions are, you're left unsatisfied.. This game is NOT GOOD! Do not get this game! There is almost no sounds except the music. There is also no variety of units. I can't really describe how bad it is, but it is bad.. I've been playing for a couple hours so far, and having a blast. I don't usually like puzzle games, but this one really got into me, because it's a great challenge.
Besides that, the soundtrack is amazing! I'm listening to it every day.. McDonald's Patty Flipper Simulator 2017. cool game and i love it. I bought this game during the 2014 holiday sale when I had a few bucks left over and nothing else on my wish list. I am very glad I got it now, as opposed to the other prospects I had lined up.

This game plays like Risk, but has some really awesome new mechanics that make the game worth getting. The biggest mechanic is the game's titular use of greed to change the landscape: you can use harvesters to work the land and get money, but ever time you do, the land they stand on is slowly lowered until it collapses. This introduces some seriously awesome strategies in the game; one time I planted a harvester in the middle of an enemy island in order to collapse it and take out everyone on the island. I didn't have to use any of my troops or engage in a time-consuming siege- all I had to do was attack an unprotected square my opponent had left neglected, plant a harvester there, and laugh as the ground literally crumbled under their troops.

This review is getting really long, but let me just tell you this before I finish: GET THIS GAME. It's definitely worth it, and the only things wrong with it aren't even part of the game itself, they're problems with the developer, whom has discontinued supporting the game and thusly Greed Corp's servers are dead.

The campaign is about 10 hours of gameplay, and it's pretty nice. However, the true worth of this game comes from the multiplayer, which can still happen... we always find a way. My only regrets is that this game doesn't have any steam workshop support, and that the developer seems to have done a disappearing act.. I do not usually leave reviews but ♥♥♥♥ these developers. Incredibly scummy. The Frost DLC is a complete scam and straight up deceptive. The microtransactions in this game as stated by other reviews are stupid and ruin the game. Most of the skins are simply recolors of the base skin or one other new skin and yet they put them behind ♥♥♥♥ing microtransaction ♥♥♥♥♥♥♥t. The tower of time is nonsense and not fun. The kombat is decent and as expected from other games in the franchise. Lastly, the story is decent. Rest of the game is complete trash though and a nonsense grindfest.. You should support any rugby game, despite this ones many flaws. First impressions: Eh...

It's not very well optimized, very confusing and at times glitchy AI, but it seems like it has a lot of potential. IMO, it should've been released as an early access game first to iron out the bugs and lack of direction it gives, but I'll be writing a full review of this game once the extended tutorial and more game levels are out. All the maps look pretty much the same and the world generation needs some work.

As of now, it's quite barebones and doesn't hold much substance to it. Great concept, however. Buy at your own risk.

\u2610 Free. the only redeemable feature for this game was the text to speech and that was removed because it was "found" to be the thing that prevented this game from being serious. the tuttorial is about as non-exsitent as it is useful, there is only one free map and it rotates and there are three maps total, all of them boring. now you can pay a subscription fee to get the other 2 maps all the time but its got no point because even if you do the game is still boring.

its only reedemable feature being removed this "game" will slowly descend to the bottom of the virtual trashcan were it belongs.. awesome little game -- i like it :-). Cured of all my illness by a surprise\u2665\u2665\u2665\u2665\u2665\u2665rammed down my throat.

10\/10 very realistic.

(negative review for falsely advertising trading cards). I want more. This is good so far.

There's blurriness (like many other VR titles at first) but once thats gone, this will probably be my go to for new friends who have never played VR before.

Flying around a boss while also shooting feels pretty good. Its a little slower than I'd like. I would reference Space Dragons for a similar playstyle that is a bit faster.. best pc version of smash bros,I like it very much cause the characters is unlock by playing. the dlc is also worth the money since all the characters are unique especially the zombie
very recommended for people that want a simple non combo wombo fighting game. If your VR setup and situation accomodate a VR/non-VR asymmetric co-op experience, then this is easily one of the best choices currently available. We had an absolute blast playing it yesterday and shouting orders at each other.

It's obviously quite simple in terms of basic interactivity, but between how much in advance you prepare which resources (to be ready in time but also not rot before you use them), what order you use them in, and the time pressure of multiple concurrent customers, 3-starring the later levels gets really challenging quite quickly.. Great Job :)

This game is fantastic :)

a game similar to Resident Evil or Silent Hill . Great job , a game I really like , and look forward to more projects with RPG Maker :)

I make myself a big project :). The astetic is nice and cute but this game has no sound options at all. I've played though all the 2 and 3 snake levels and it feels like they are just the warm up for the harder levels. Controls are lacking. The camera is locked to isometric corners and can obstruck your view. Nonsnake blocks can be made see-through. While you can change the view with wasd or the arrows the snakes can only be moved by the mouse and they often don't move as you want them to. (If you don't click on a snake head you will move the camera which can be annoying) Becaues you can click on the boxes in the top left to draw the snakes back one square you can just try again but I would rather it work the first time.
Overall the game could be alot better and the lack of good controls are killing my wish to finish the game, maybe I will come back to it at some poin and try to finish it out. As it is I wouldn't pick it up unless you are okay with it's clunky nature.. As an avid fan of manager games and having sunk several hundreds of hours into FM, I was excited to see this game released. I skipped the 2015 edition of this game and hoped that 2016 would be a better game. So far, this game has not met my expecations.

The game is clunky, UI is messy, and the 3D engine is quite disastrous. Everything runs a couple seconds late, the animations are bad at best, and the game does not come with the right tools for you to make on the fly decisions as a "basketball manager."

That isn't to say this game does not have potential. The foundation has been laid for what could be a great game, but the devs will need to expand upon it to optimze the game performance and reduce the crashes. If they can do that, I would have happy to

change my review to a recommend, but at this point, I simply cannot recommend this to anyone, even if you are a fan of simulation series\/basketball.
